Lab 5 Report Guidelines

ECSE 324 - Computer Organization

Fall 2019

Content

Write a report of no more than 6 pages and no less than 3 pages (excluding appendices and cover page). The report should introduce all the tasks completed in this lab, describe the approach taken to complete them, and outline any issues encountered and improvements made.

Do not paste large sections of code in the text body of the report. Small (2-4 line) chunks of code are acceptable to convey a particular point, while large pieces of code are better represented though figures like flowcharts.

Formatting

Respect the formatting of a formal report

- Cover page with title, group number, names, student IDs and date.

- Readable and consistent font throughout the report.

- Page numbers at the bottom of each page (except the cover page).

- Good formatting of sections and subsections (numbering or consistent font to distinguish them).

- Figure captions at the bottom, table captions at the top. equation numbers on the same line.

- Consistent numbering and referencing for figures, tables and equations.

- Adhere to the accepted document formats. (only PDF for this course)

Grading

The report is worth 20% of the Lab 5 grade. 15% from the presentation section and 5% from the efficiency section in the lab 5 handout will count towards the report.

Submission

Save your report as GXX_Lab5_Report.pdf (where GXX stands for your group number). Reports submitted in any format other than PDF will be penalized. Along with your report, submit your entire Lab 5 project directory (including the Monitor Program project). Your submission of the report and code should be contained within a single compressed directory named GXX_Lab5.zip. **Do not** use any other compression format. The submission is due by **11:59 pm, the last day of class.**
